

# Law Debenture

From its origins in 1889, Law Debenture has diversified to become a group with a unique range of activities in the financial and professional services sectors. The group divides into two distinct complementary areas of business.

### **Investment trust**

We are a global investment trust, listed on the London Stock Exchange.

Our portfolio of investments is managed by Henderson Global Investors Limited under a contract terminable by either side on 12 months' notice.

Our objective is to achieve long term capital growth in real terms and steadily increasing income. The aim is to achieve a higher rate of total return than the FTSE All-Share Index through investing in a portfolio diversified both geographically and by industry.

### **Independent fiduciary services**

We are a leading provider of independent fiduciary services. Our activities are corporate trusts, treasury management and structured finance administration, pension trusts, corporate services (including agent for service of process) and whistle blowing services. We have offices in London, Sunderland, New York, Delaware, Hong Kong, the Channel Islands and the Cayman Islands.

Companies, agencies, organisations and individuals throughout the world rely upon Law Debenture to carry out its duties with the independence and professionalism upon which its reputation is built.

### **Registered office**

– Independent fiduciary services	<b>2.26</b>	2.56	5.35
Group revenue return per share	<b>6.62</b>	8.74	15.58
Dividends per share	<b>4.20</b>	4.20	12.20

## Performance to 30 June 2009

	6 months %	12 months %
Share price	<b>2.7</b>	-18.3
NAV total return	<b>1.5</b>	-17.8
FTSE All-Share Index total return	<b>0.8</b>	-20.5

## Basis of preparation

The results for the period have been prepared in accordance with International Financial Reporting Standards (IAS 34 – Interim financial reporting).

There have been no changes to the group's accounting policies during the period.

## 2 Interim management report

### Performance

In the six months to 30 June 2009 our net asset value total return per share increased by 1.5%, compared to a total return of 0.8% for the FTSE Actuaries All-Share Index.

### Revenue return and dividends

Revenue return per share for the period was 6.62p, a decrease of 24.3% from 8.74p for the corresponding period last year. The investment trust suffered a significant reduction in income as companies cut dividends and interest rates fell. £15million was invested in short dated quality corporate bonds with yields of around 6% to reduce the negative impact on revenue return.

The board has declared an interim dividend of 4.2p. The dividend is payable on 9 September 2009 to shareholders on the register on 14 August 2009. The current expectation of the directors is that the final dividend will be maintained. The board is reviewing the timing of the payment of the final dividend.

### Investment manager's report

The portfolio has begun to recover some of the ground lost in 2008.

During the first three months of the period, equity markets fell as the world's economy continued to suffer a severe contraction. Company profit expectations were reduced and levels of corporate debt became an increasingly pressing problem. There was a recovery in share prices from late March following which a number of companies sought to raise new equity capital. The investment trust took up its rights under issues from companies including HSBC and Great Portland Estates. Investments were also made in high quality corporate bonds of relatively short duration, benefiting our revenue which has suffered due to dividend cuts by many companies in the portfolio and low interest rates on deposits. Our investment manager believes that most of the cuts have now been made and that dividend growth should resume in 2010.

In addition to investing in equities and corporate bonds, holdings were sold where it was believed that the company would not cope satisfactorily with the difficult economic climate. Over the period effective gearing reduced from 108% to 106%. The holding in the Henderson Far East OEIC was reduced, with the proceeds used to buy three other Far East trusts.

The global economy is stabilising but overall growth is slow. Companies in the portfolio are reducing costs and focusing on generating cash. The investment manager believes that these companies will over time prove to be good investments, being well placed to take advantage of a recovery when it comes.

### **Independent fiduciary services**

The profit before tax for our independent fiduciary services business fell by 13.1% compared with the corresponding period last year. While revenues were, on the face of it, up on the previous year, this was largely attributable to legal fees incurred and recharged to third parties, which are included both in revenue and in cost of sales.

Our corporate trust business has seen an overall reduction in new opportunities, but there has been an increase in investment grade corporate bond issues. Additional work continues to arise on established trusts as a result of the impact of the recession on companies. Our corporate services business has been affected similarly with a reduced level of new appointments but with special work on existing business. Service of process work has slowed significantly during the period as a result of reduced corporate transactions activity. Our pension trustee business continues to see new business enquiries and the new members of the team recruited at the end of 2008 have taken on new clients.

In the US new business won at the end of 2008 and organisational changes made at the beginning of 2009 have benefited the results for the period.

The profile of our independent whistleblowing service provided by Safecall is increasing in the current economic environment.

Because of the general reduction in new business, steps were taken to reduce costs. From 1 April 2009, future pension benefits accruing to employees through the defined benefit pension scheme were reduced, transferring some of the mortality and investment risks to employees. In July 2009, following a review of our UK business, headcount was reduced partly as a result of merging our treasury management and structured finance administration businesses. This will reduce costs from 2010, whilst being neutral for this year.

There is no doubt that market conditions remain tough. But Law Debenture's traditional strengths of independence and quality of service should ensure that we continue to win our fair share of new business opportunities.

## **Principal risks and uncertainties**

The principal risks of the group relate to the investment activities and include market price risk, foreign currency risk, liquidity risk, interest rate risk and credit risk. These are explained in the notes to the annual accounts. In the view of the board these risks are applicable to the remaining six months of the financial year as they were to the period under review.

## **Related party transactions**

There have been no related party transactions during the period which have materially affected the financial position or performance of the group. During the period transactions between the Corporation and its subsidiaries have been eliminated on consolidation. Details of related party transactions are given in the notes to the annual accounts.

## **Directors' responsibility statement**

We confirm that to the best of our knowledge:

- the condensed set of financial statements has been prepared in accordance with IAS 34 Interim Financial Reporting as adopted by the EU;
- the interim management report includes a fair review of the information required by:
  - (a) DTR 4.2.7R of the Disclosure and Transparency Rules, being an indication of important events that have occurred during the first six months of the financial year and their impact on the condensed set of financial statements; and a description of the principal risks and uncertainties for the remaining six months of the year; and
  - (b) DTR 4.2.8R of the Disclosure and Transparency Rules, being related party transactions that have taken place in the first six months of the current financial year and that have materially affected the financial position or performance of the entity during that period.

On behalf of the board

**Douglas McDougall**

23 July 2009

## **Notes**

1. The financial information presented herein does not amount to full statutory accounts within the meaning of Section 435 of the Companies Act 2006 and they have neither been audited nor reviewed pursuant to guidance issued by the Auditing Practices Board. The annual report and financial statements for 2008 have been filed with the Registrar of Companies. The independent auditors' report on the annual report and financial statements for 2008 was unqualified, did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying the report, and did not contain a statement under 237(2) or 237(3) of the Companies Act 1985.
2. The calculations of NAV and earnings per share are based on:  
NAV: shares at end of the period 117,130,631 (2008, June: 117,023,883) (2008, December: 117,261,943).  
Income: average shares during the period 117,153,099 (2008, June: 117,027,094) (2008, December: 117,124,503).
